FULL STACK DEVELOPER

Full Stack Developer with over **3 years of experience** building scalable enterprise web platforms, real-time systems, and AI-integrated features using **React, Angular, and Node.js**.

TECHNICAL SKILLS

Languages	: C, C++, Java, JavaScript, TypeScript, HTML, CSS, SQL
Frameworks	: Node.js, Express.js, React.js, Angular
Libraries	: Mongoose, RxJS, Angular Material, Socket.IO, Nodemailer
Databases	: MySQL, MongoDB, Redis
Tools & DevOps	: Git, GitHub Actions, Docker, CI/CD, Jira, Postman, VS Code, k6, Claude Code
Concepts	: Data Structures & Algorithms, OOP, JWT Authentication, OAuth 2.0, Role-Based Authorization, REST APIs, Microservices, OpenAI GPT-4 API

EXPERIENCE

Full Stack Developer <i>Sakav Technology Pvt Ltd</i>	Dec 2022 – Present <i>Pune, India</i>
Clearpath (myclearpath.com)	Dec 2024 – Present
- Optimized MongoDB connection pooling, sustaining 500 concurrent virtual users at 0% failure rate in k6 load testing. - Built a GPT-4-powered chatbot for appointment scheduling, matching patient requests to available doctor slots. - Built the core backend architecture using Express.js and RESTful API conventions, with JWT-based session management and MongoDB Atlas as the primary database. - Built real-time notifications and in-app chat functionality using Socket.IO, delivering instant updates without page refreshes. - Implemented Redis caching for frequently accessed data, reducing database load and improving API response times. - Integrated Google OAuth 2.0 for secure, one-click user authentication, simplifying the sign-up flow.	
International School Services (iss.edu)	Jan 2023 – Dec 2024
- Built a large-scale, enterprise-level web platform for ISS, supporting 1,200+ international schools worldwide, using Angular and Express.js. - Integrated OpenAI's GPT-4 API to power smart candidate suggestions, streamlining the hiring workflow for schools sourced through job fairs. - Reduced initial bundle size by 30% (2.3MB → 1.6MB) via lazy loading and route-level code splitting, improving load performance on low-bandwidth networks. - Architected a real-time messaging system using Socket.IO, supporting 100+ concurrent connections with low-latency delivery. - Implemented JWT-based authentication and role-based authorization for secure user management. - Built reusable UI components using Angular Material, with RxJS handling pagination and data streams to keep the UI consistent across features. - Added email OTP verification using Nodemailer during signup, providing an extra layer of protection against fraudulent account creation.	

EDUCATION

Chameli Devi Group of Institutions <i>B.Tech. in Computer Science, CGPA: 7.55/10</i>	Indore, India 2018 – 2022
